

REST API Documentation

**Warning**

Documentation for this API is being released on a provisional basis. Details for this API (URLs, methods, parameters, etc.) will change with minimal notice as it is further developed.

These APIs describe how to communicate with Click With Me Now servers directly over HTTPS.

An asterisk next to a parameter indicates that it is required.

Path	Method	Parameters	Result Fields	Description	Example Usage
/session/inviteToHost	GET	hostName* hostEmail guestName* guestEmail* message* url* screenDomain* guestOs guestBrowserName guestBrowserVers ithJoinCode	hostLink guestLink	Creates an invite to host a session. If guestEmail is provided, then the invite is sent to the guest via email.
